

DIAMOND CORE DRILL DDR-V 1 3/8" (35mm) KERAMIK PRO

Brand: Distar

Product Code: DCD35AG0004

Availability: In Stock

Dimensions: 0.00in x 0.00in x 0.00in

Price: CA\$35.00

Short Description

DIAMOND CORE DRILL DDR-V 1 3/8" KERAMIK PRO is a high-performance tool designed for precise drilling of ceramic tiles, frost-resistant ceramic granite, and other hard materials. Engineered for durability, speed, and versatility, it ensures clean, chip-free results for both professionals and DIY enthusiasts.

Description

The **DIAMOND CORE DRILL DDR-V 1 3/8" KERAMIK PRO** represents the pinnacle of vacuum drill technology, optimized for cutting through ceramic materials, including dense and frost-resistant ceramic granite. With advanced engineering and premium diamond durability, this core drill is indispensable for achieving professional-grade results.

Key Features

- **Diamond Durability:** High-strength diamonds embedded in a robust binder offer exceptional lifespan and performance.

- **Immaculate Precision:** Guarantees clean, chip-free holes with no risk of material damage.
- **Dual Functionality:** Supports both dry and wet drilling, making it suitable for diverse project requirements.

Advantages

- **High Efficiency:** Rapid drilling speeds ensure projects are completed swiftly and effectively.
- **Reliable Results:** Precision-engineered to deliver consistent, flawless holes in ceramic coatings and granite.
- **Built to Last:** Rugged construction ensures extended durability, even under intensive use.

Applications

- **Professionals:** Ideal for construction, renovation, and interior finishing requiring precision and quality.
- **DIY Enthusiasts:** Simplifies ceramic drilling tasks in home projects with exceptional ease and safety.
- **Construction Firms:** Ensures efficiency, reliability, and cost-effectiveness for projects of all scales.

Unlock the full potential of your ceramic drilling needs with the **DIAMOND CORE DRILL DDR-V 1 3/8" KERAMIK PRO**. Perfect for ceramic granite, marble, and granite, it's the ultimate choice for creating pristine holes in hard materials.
