

Diamond Blade 1 3/4" Butterfly Gres with Mandrel

Brand: Distar

Product Code: 11133053027

Availability: In Stock

Dimensions: 0.00in x 0.00in x 0.00in

Price: CA\$34.90

Short Description

Ultra-thin 1 3/4" Butterfly Gres diamond blade supplied with mounting mandrel. Designed for precision cutting of porcelain, ceramic, and fine tile using rotary tools and long neck angle grinders.

Description

Diamond Blade 1 3/4" Butterfly Gres for Long Neck Angle Grinders & Rotary Tools

Precision, rigidity, and control come together in the **Diamond Blade 1 3/4" Butterfly Gres**. Designed specifically for long neck angle grinders and rotary tools, this ultra-thin diamond blade is ideal for detailed tile work where accuracy and clean edges are critical.

Supplied with mounting mandrel.

Key Features

- **Ultra-Thin Diamond Cutting Layer (0.6 mm)**

The 0.6 mm diamond layer delivers extremely fine, chip-free cuts with minimal material loss. Perfect for precision work on porcelain, ceramic tile, and fine gres.

- **High Structural Rigidity**

Unlike galvanic discs, the Butterfly Gres blade features a rigid construction that prevents blade deflection, ensuring straight, accurate cuts even during delicate operations.

- **Compact 45 mm (1 3/4") Diameter**

The small diameter allows excellent maneuverability for detailed cuts, including hatches, access holes, furniture cut-outs, trims, and decorative elements.

- **Stable, Deviation-Free Cutting**

High stiffness ensures the blade tracks precisely without wandering, delivering consistent results on intricate and fine-detail projects.

- **Compatible with Water Cooling Systems**

Designed for use with water-fed cutting setups, helping reduce heat, extend blade life, and maintain cutting performance during longer ?? cycles.

- **For Long Neck Angle Grinders & Rotary Tools**

Suitable for a wide range of precision tools, making this blade a versatile solution for professional tile setters and finish work.

Why Choose the Butterfly Gres Blade?

The **Diamond Blade 1 3/4" Butterfly Gres** is built for professionals who require maximum control, clean edges, and absolute accuracy. Whether working on porcelain stoneware, fine ceramic tiles, or detailed finishing tasks, this blade delivers reliable, high-precision performance where standard discs fall short.
