

DIAMOND CUTTING BLADE DISTAR 3" (76mm) COLIBRI

Brand: Distar

Product Code: 11139053029

Availability: In Stock

Dimensions: 0.00cm x 0.00cm x 0.00cm

Price: CA\$54.80

Short Description

Ultra-thin 3" diamond blade Colibri for precise, chip-free cutting of ceramic and porcelain. Ideal for detailed work, cutouts, and fine finishing.

Description

The **Distar Colibri 3" (76 mm) Diamond Blade** is a specialized ultra-thin cutting tool designed for precision work on ceramic, porcelain, and decorative materials. When standard blades are too large for delicate operations, the Colibri provides excellent control and accuracy.

With a diamond layer thickness of just **0.8 mm** and a final kerf of approximately **1.0 mm**, this blade delivers clean, precise cuts with minimal material loss. It is ideal for creating small openings, detailed shapes, and complex design elements.

The ultra-thin **0.5 mm steel core**, combined with stabilizing flanges, helps ensure straight and stable cutting during intricate operations. Compatible with both corded and cordless angle grinders, the blade is optimized for dry cutting and precision job site work.

Important: For 3-inch diamond blades (with a 3/8" or 10 mm arbor), it is recommended to use a **mini angle grinder** or a **3-inch cut-off tool**. These compact tools are specifically designed for precision cutting and allow better control when working on detailed applications.

Key Features

- **Diameter:** 3" (76 mm)
- **Ultra-thin diamond layer:** 0.8 mm
- **Clean kerf:** approx. 1.0 mm
- **Steel core thickness:** 0.5 mm
- **Application:** porcelain, ceramic, decorative tile
- **Mounting hole:** 10 mm
- **Cutting mode:** dry cutting only
- **Compatibility:** mini angle grinders and 3-inch cut-off tools
